PROFESSIONAL SUMMARY

Software Engineering undergraduate with a strong academic background and hands-on experience in **software development, programming, and problem-solving**. Familiar with **object-oriented programming, data structures, algorithms, and web application development** through academic and personal projects. Proficient in applying **theoretical concepts to practical implementations**, including building, testing, and debugging applications. Demonstrates a strong willingness to learn new technologies, collaborate in **team-based development environments**, and contribute effectively as a **Software Engineering Intern**. Familiar with **Git, REST APIs, databases, and Agile development practices**.

CORE SKILLS

- **Backend Development** – MongoDB, JAVA, PHP, Node.js, JavaScript, SQL, Express.js, C++
- **Frontend Development** – React.js, Next.js, Html5/CSS, Tailwind CSS, Bootstrap
- **Technologies** – MERN Stack, Springboot
- **Mobile App Development** – Kotlin, JAVA, Android Studio
- **QA Testing** – Postman, SDLC, Test Case writing, Performance testing
- **Soft Skills** – Leadership, Team Work, Project Management, Critical Thinking, Communication, Problem Solving, Adaptability, Quick Learning, Experimenting
- **Version Control & Tools** – Git & GitHub, Jira

CERTIFICATIONS

- SLIIT Dean's List Award 1st Year 1st Semester (2024)
- SLIIT Dean's List Award 1st Year 2nd Semester (2024)
- SLIIT Dean's List Award 2nd Year 1st Semester (2025)
- SLIIT Dean's List Award 2nd Year 2nd Semester (2025)
- Web Design for Beginners – University of Moratuwa
- Front End Web Development – University of Moratuwa
- Python for Beginners – University of Moratuwa
- Python Programming – University of Moratuwa

EDUCATION

- **SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT) |2023 – Present**
 - Bsc(hons) in Information Technology Specialization in Software Engineering (Undergraduate)
 - **Cumulative GPA – 3.89/4.00**

UNIVERSITY & PERSONAL PROJECTS

ELIXRA – Smart Health Care Platform

Developed a **Cloud-native microservices healthcare platform** enabling patients to book appointments, attend video consultations, upload medical reports, view prescriptions, and receive **AI-powered** symptom analysis. Doctors manage profiles, availability, conduct telemedicine sessions, and issue digital prescriptions. Used **separate database for each microservice**.

Springboot, Java, Microservices, MySQL, Docker, Kubernetes, Service Discovery (Eureka), AI Integration, Agora, Twilio, Stripe, Github, React

RebuildHub – Crowdsourced Damage Assessment and Aid Distribution Platform

Full-stack disaster relief platform that connects donors, volunteers, and affected communities. Implements resource and inventory management, volunteer coordination, event and aid workflows, donation/payment processing, **role-based authentication/authorization**, **Cloudinary media uploads**, **Google map api**, **weather api integration**, **input validations**, and automated tests to ensure reliable API behavior and operational readiness

MongoDB, Express.js, React.js, Node.js, JavaScript, Twilio, Google Map, Cloudinary, Stripe, Weather Api, HTML, CSS, GitHub

Clinic Appointment and Prescription Management System

Developed a **Clinic Appointment and Prescription Management System** supporting appointment scheduling, prescriptions, lab workflows, pharmacy inventory, and **role-based access control**. Implemented **secure authentication**, responsive dashboards, doctor calendars, and appointment management features, with **data validation and logging** to improve system reliability, performance, and data accuracy.

MongoDB, Express.js, React.js, Node.js, JavaScript, HTML, CSS, GitHub

Online School Information Management System

Developed a centralized **Online School Information Management System** to manage student records, exams, timetables, admissions, and school events. Enabled access to **student profiles**, **academic and non-academic staff information**, and **extracurricular activity data**. Implemented **secure user authentication** and structured data handling to improve **operational efficiency and data accuracy**.

JAVA, HTML, CSS, SQL, GitHub

SLIIT GPA Calculator for All Specializations

Developed and deployed a **web-based GPA Calculator** for all **SLIIT specializations from 3rd year onward**, covering first- and second-year modules as well as compulsory and elective modules in later years. Implemented **CGPA and W GPA calculations** based on earned grades and completed credit counts, ensuring accurate academic evaluation.

MongoDB, Express.js, React.js, Node.js, JavaScript, HTML, CSS, GitHub

Wedding Planning Mobile App

Designed and developed a compact **wedding planning mobile application** featuring a personalized homepage with an image-based quick-access grid and persistent **BottomNavigationView**. Implemented core modules including a **Vendor Marketplace**, **Timeline Creator**, **Task Manager**, and **Budget Planner** for end-to-end event planning. Built using **Kotlin and Java** with **Gradle**, **Material Components**, and **Jetpack libraries** for UI structure and navigation.
